Courses and workshops

T2T offers courses and workshops for instructors.

T2T Beginning

T2T Intermediate

T2T Advanced

ATC offers workshops on specific topics and individual support as well as available student helpers for some projects.

ATC offers a drop-in lab and specialized services.

Summer course offerings from T2T

For College Now instructors:

Summer Academy on June 21-24 for an overview of teaching online and Moodle tools.

You will see the possibilities that you may want to work with.

For LCC instructors and College Now instructors:

Beginning course for the 8 week summer term.

This is a fully online course where faculty will have use of their own Moodle shell to practice in as they set up their courses.

T2T Offerings and their content

Beginning for Developing an Online or Hybrid course:
combine best practices for online instruction with transformation of existing material and techniques for using the Moodle tools to create an online or hybrid course.
Intermediate with multi media and social networking:
making audio and video tools for use online combined with web 2.0 tools for social networking and student interaction.

Advanced Improving Online Courses:
to improve teaching and build community along with using a non evaluative framework for peer review.

The goal is to create a highly interactive course with media rich materials and social networking that allows students the chance to collaborate and to discover.

Join other faculty at LaneCC as we rely on the expertise of each other in the
Teacher 2 Teacher format on our journey toward teaching with technology.
