Physiotherapy and Physical Therapy Assistant

Decision-making is influenced by input from the referral source and the patient. The decision is informed by the patient's history, physical examination, and other relevant information. The decision is made in consultation with the patient and their healthcare team.

The problem-solving algorithm utilized by PTAs in Patient/Client Interactions

Problem-solving Algorithm Utilized by PTAs in Patient/Client Interactions
See Consulting Assumptions on Previous Page.

Problem-Solving Algorithm Utilized by PTs in Palliative Intervention
